U-PASS

UNMANNED PILOT
ASSOCIATION FOR SAFETY AND
STANDARDS

About Us

U-PASS's mission is to educate to eliminate the challenges faced by unmanned agricultural pilots. Our board of unmanned ag pilots will work hand in hand with state Departments of Agriculture AND State legislatures to provide best practices and compliance guidance to ensure safe and profitable drone operations. Let us help you unlock the full potential of your agricultural drone business.

FAA Regulations

Navigating the complex world of FAA agriculture drone application regulations can be a challenge. U-PASS will assist in providing expert step-by-step guidance and compliance understanding to ensure your operations are legal and compliant.

State Regulations

Understanding state regulations, requirements, study materials, and testing can be confusing. U-PASS outlines most state requirements and has representatives available to assist with any questions.

U-PASS

Crop Flight Drone Logbook

A large part of aerial application compliance is keeping a logbook of all your drone flights. After servicing over 200 ag pilots, U.PASS recommends the ONLY U.S. created Crop Flight logbook to stay compliant without spending unnecessary costs on logbooks.

Ag Drone Advocacy

U-PASS collaborates with the Agricultural Drone Initiative (ADI) in Washington, DC. Please locate the articles related to drones and U-PASS's stance in the "Get Involved" section.

Ag Help Videos

U-PASS offers various video series, including FAA compliance, conversations with real agricultural pilots, channels from all major drone distributors, and more.

Ag Curriculum

As leaders in the agriculture industry, U-PASS believes in sharing our knowledge and expertise. We are dedicated to providing hands-on education and need you to get involved! Currently, over 2200 high schools have access to the U-PASS curriculum in partnership with Farm-i-tude.
